Application for Registration of Pesticides

ARS 3-351; AAC R3-3-702

For the year ending December 31, _____ : ☐ One year ☐ Two years

Name and Address of Applicant	Name and Address of Company appearing on labels

Submit a separate application for each company appearing on labels. Application is hereby made for a certificate of registration for the listed pesticides pursuant to A.R.S. 3-351.

\$_____ is enclosed to cover the fee of \$100 per pesticide brand for each year of the registration period (Please make check payable to Arizona Department of Agriculture/ESD.)

Enclose two copies of your "field" label and one MSDS for each pesticide brand. Indicate the EPA registration number and product brand name on each MSDS.

EPA Registration No.	Brand and Name of Product
	1
	2
	3
	4
	5
	6
	7
	8

For toxicological and safety data, contact the listed person(s) and telephone number(s).

I certify the label(s) submitted with this application are current, accurate and have been approved by the US Environmental Protection Agency, as applicable. The information contained in this application is true and accurate to the best of my knowledge. I understand that providing false information is a felony in Arizona.

I certify that all data required by ARS 49-302 for each of the agricultural pesticides listed has been submitted to the Arizona Department of Environmental Quality and found complete and acceptable. (See reverse for additional information.)

3-351. Registration; fee; confidential information

A. Every pesticide which is distributed, sold or offered for sale within the state or delivered for transportation or transported in intrastate commerce or between points within this state through any point outside the state shall be registered with the division. Through 1998, the registration expires on December 31 of the year in which the registration was made and shall be renewed annually. Beginning in 1999, the director may provide by rule for registration having a term of one or more years and may prescribe the date on which registrations expire.

B. The registrant shall file with the division a statement including:

1. The name and address of the registrant and the name and address of the person whose name will appear on the label, if other than the registrant.
2. The name of the pesticide.
3. A complete copy of the labeling accompanying the pesticide and a statement of all claims to be made for it including directions for use.
4. If requested by the division, a full description of the tests made and the results thereof upon which the claims are based.

C. For a renewal of registration, a statement shall be required only with respect to information which is different from that furnished when the pesticide was registered or last reregistered.

D. Any person desiring to register under the provisions of this article shall pay to the division a registration fee of one hundred dollars per year for each pesticide. The monies collected from registration fees shall be allocated as follows:

1. Twenty-five dollars for each year of the registration term shall be allocated pursuant to section 3-350.
2. Seventy-five dollars for each year of the registration term shall be deposited in the water quality assurance revolving fund established by section 49-282.

E. All federal, state and county offices shall register without fee all pesticides sold at cost by them.

F. If the director deems it necessary in the administration of this article, the director may require the submission of the complete formula of any pesticide or the confidential statement of formula and the analytical methods for the analysis of the active ingredients in the formulation. For any product having a federal registration, the director may request, upon reasonable cause, the analytical methods for the analysis of residues of the active ingredients of the pesticide in environmental media provided that this information has been developed by the applicant and submitted to the United States environmental protection agency. Information provided by the applicant pursuant to this section shall be afforded applicable trade secret and confidentiality protections. Other products exempted from federal registration requirements and required to be registered under this section shall be subject to this subsection.

G. If it appears to the director that the composition of the article is such as to warrant the proposed claims for it and if the article and its labeling and other material required to be submitted comply with the requirements of section 3-352, the division shall register the article. If the director finds that the pesticide does not warrant the proposed claims, the director may request a full description of the tests conducted and the results of the tests on which the claims are based. If the pesticide or its labeling and other material that are required to be submitted do not comply with this article, the director shall notify the applicant of the manner in which the pesticide, labeling or other material fails to comply with the law to afford the applicant an opportunity to make the necessary corrections. If the applicant does not make the corrections and cannot support the claim on the label, the director may refuse to register the pesticide.

H. In submitting data required by this article, the applicant shall clearly mark any portions that are trade secrets or commercial or financial information. The applicant shall identify as confidential information any such marked material and submit it separately from other material required to be submitted under this article. The information shall be kept confidential by the department unless written permission to release the information is granted by the registrant or upon order of a court of jurisdiction.

I. In order to protect the public, the associate director may, after a hearing, cancel the registration of a pesticide. The associate director shall cancel the registration of a pesticide on notification by the director of environmental quality pursuant to section 49-306 or 49-309.

J. Notwithstanding any other provision of this article, registration is not required in the case of a pesticide shipped from one plant within the state to another plant within the state operated by the same person.

K. A registrant who discontinues distribution of a pesticide shall continue its registration in this state for three years after the discontinuation to allow the remaining product to move through the channels of trade. The registrant shall notify the appropriate entities within the channels of trade of the effective date of the discontinuation.

R18-6-101. Definitions

In addition to the definitions contained in A.R.S. § 49-301, the words and phrases in this Chapter shall have the following meaning:

1. "Active ingredient" means all of the following:
 - a. In the case of a pesticide other than a plant regulator, defoliant, or desiccant, an ingredient which will prevent, destroy, repel or mitigate any pest.
 - b. In the case of a plant regulator, an ingredient which, through physiological action, will accelerate or retard the rate of growth or rate of maturation or otherwise alter the behavior of ornamental or crop plants or the product thereof.
 - c. In the case of a defoliant, an ingredient which will cause the leaves or foliage to drop from a plant.
 - d. In the case of a desiccant, an ingredient which will artificially accelerate the drying of plant tissue.
2. "Agricultural use pesticide" means any pesticide intended for use directly in the commercial production of plants and animals. It does not include animal pesticide ear tags, or pesticides intended solely for use within and around confined structures.

49-302. Information submittal

A. Not later than December 1, 1987, except as provided in subsection G of this section, a person that has registered a pesticide in this state for agricultural use shall submit to the director the following information for each active ingredient in each pesticide registered:

1. Water solubility.
2. Vapor pressure.
3. Octanol-water partition coefficient.
4. Soil adsorption coefficient.
5. Henry's law constant.
6. Dissipation studies, including hydrolysis, photolysis, aerobic and anaerobic soil metabolism, and field dissipation, under conditions in this state or similar environmental use conditions, if that information exists in studies and conclusions from other states or the United States government. If that information does not exist, the product shall be placed on the groundwater protection list pursuant to section 49-305 and is subject to monitoring and testing under section 49-307.
7. The director may by rule require such additional information as is required by the United States environmental protection agency for environmental fate parameters necessary to gain full registration under federal law.
